PATENT CLAIMS

T	C1	aim	٠	

- 5 Claim 1. An apparatus adapted for permitting the entry of manually generated alphanumeric and graphic data into a computer system, comprising:
 - a. a housing having opposite ends;
- b. a writing instrument contained within the housing and presenting a writing tip at one end of the housing for writing upon a writing surface;
 - c. a sensor system for detecting the position of the writing tip with respect to a writing surface and for detecting changes in position of the writing tip with respect to the writing surface; and
 - d. a transmission system for transmitting the position of the writing tip to the computer system.
